DECREES

Art. 1 - Object

A selection procedure by qualifications is hereby opened for the assignment of n. 1 departmental research grants with a duration of 1 year for the academic recruitment field the Competition Sector 06 / A2 - General Pathology and Clinical Pathology - Scientific

and Disciplinary Sector MED/04 - General Pathology, Macrosector 06/A – Pathology and laboratory diagnostics in the Department of Medicine and Surgery.

Research Title: “Novel anti-glioblastoma therapeutic vaccines based on optimal activation of tumor-specific CD4+ T helper cells”.

Research Project:

“The aim of the project granted by AIRC in 2021, is to construct an operating framework for a novel approach to therapeutic vaccination against glioblastoma (GBM). The working hypothesis will be to render tumor cells MHC-IIpositive and then surrogate presenting cells for their own tumor antigens to T helper cells. This will be attempted by transferring the MHC-II transactivator (CIITA), into GBM cells. The granted person will be in charge of the in vitro and in vivo immunological studies in mice injected with distinct GBM cell lines, parental and CIITA-transfected. In particular, he/she will assess the capacity of the mice to reject the CIITA-GBM tumor cells and to generate an immune response capable to be transferred by lymphocytes to naïve recipients in adoptive cell therapy experiments. Importantly, MHC-II bound peptides will be isolated from CIITA-GBM tumor cells, and their immunogenicity will be tested in vitro. The fellowship recipient will be also involved in the in vitro analysis of immunogenicity of human GBM tumor-associated HLA-II bound selected peptides isolated from patients.”

This research will be carried out in the Department of the Department of Medicine and Surgery of the University of Insubria

Research Coordinator: Professor Greta Forlani.
