“AI: Economics, Law and Ethics – An interdisciplinary approach”

This first meeting will provide an overview on the recent developments of the European and Italian regulatory framework in the light of the EU Commission White Paper of February 2020 on AI with the help of experts of various disciplines, who were members of the Independent Commission on Artificial Intelligence set up by the Italian Ministry of Economic Development (MISE) for devising the strategy for Italy. We will discuss the benefits and the risks of Artificial Intelligence, with a holistic approach that takes into account the business perspectives, laws and ethical implications.
